

POST: Created a new player “Test Player” in the cricket.players collection via POST /api/players, receiving the persisted document with a generated _id.

id: 68d9ec1017e36e5e2a714548

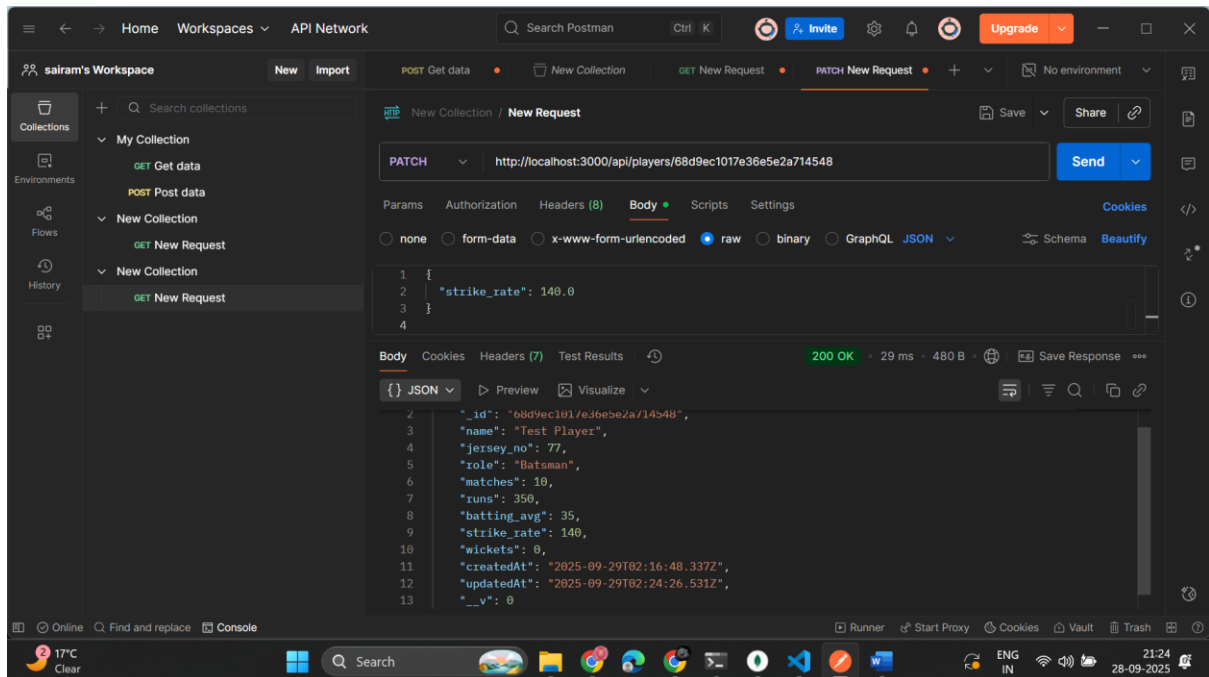

GET: Retrieved all players via GET /api/players, confirming the newly created test player is present in the list.

PATCH: Updated the same test player via PATCH /api/players/68d9ec1017e36e5e2a714548, verifying the response reflects the modified field(s).

Updated strike_rate from 128.5 to 140 player “Test Player”

DELETE: Removed the same test player via DELETE /api/players/68d9ec1017e36e5e2a714548, with the API returning the deleted document as confirmation.
